DETAILED ACTION

Specification

The abstract of the disclosure is objected to because it exceeds 150 words in length. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited.

Correction is required. See MPEP § 608.01(b).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 2 and 4-32 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-48 of U.S. Patent No. 6,687,029 B2.

Art Unit: 2872

Although the conflicting claims are not identical, they are not patentably distinct from each other because they recite the same features; however, they are composed to encompass broader or narrower scopes. For example, new claims 1, 2, 10, 11 and 16 correspond respectively to claims 2, 39, 8, 9 and 26 of U.S. Patent No. 6,687,029 B2. In the newly presented claims, some elements of the patented claimed invention have been labeled differently. For example, new claim 1 recites an "observation optical system" rather than a "viewing optical system", and an "eyepiece optical member" instead of an "ocular optical member"; new claim 2 recites a "photographing optical system", rather than "an image pickup."
